- Certification in Multimedia**
Graphic design & Animation
Explora Design Skool – 2013

Soft Skill's

TIAA Global Business Services – IT Asset Manager

- **IT Asset Management Leadership**- Lead a team of 4, acting as the single point of contact for stakeholders, vendors, technology/product owners, and data center teams to ensure smooth communication and timely issue resolution.
- **Asset & Model Lifecycle Oversight**- Manage RITMs, IMAC tickets, and change tasks to maintain accurate asset/model data. Normalize manually created and ServiceNow-discovered models using HAM Pro content library standards.
- **Reconciliation & Database Accuracy** - Conduct monthly reconciliation between Finance Book of Records (FAR) and ServiceNow HAM Pro. Identify and resolve discrepancies across CMDB, AMDB, SACM, and discovery sources to ensure data integrity.
- **Physical Asset Verification & Disposal**– Perform monthly spot checks and annual audits (book-to-floor and floor-to-book) to validate physical assets. Dispose of end-of-life assets with zero netbook value, ensuring proper documentation with Certificates of Destruction.
- **Reporting & Analytics** - Generate reports and dashboards for asset lifecycle, chargebacks, inventory flow, network assets, and maintenance using ServiceNow Reports and Power BI.
- **Remediation Planning**- Collaborate with Lines of Business to pre-emptively address technology risks. Support remediation planning, tracking, and exceptions for assets nearing end-of-life.
- **Established governance over** CMDB configuration database management, Asset Management to ensure audit compliance and data integrity.
- **Coordinated data migration and cleansing** - ensuring integrity across CMDB, asset records, and workflow histories using reconciliation techniques and automation scripts.

Awards at TIAA

Rewarded with Silver Award and Appreciation for India CEO, CTO & CAO Data quality Management
Monitoring & Control Phase of Project
Awarded for Implementation of new IT standard for Asset Reported Missing for more than 90 days - Aug 2025

Awards at IBM

1. Awarded with Blue thanks points for Managing all the KPI for a team of 22 people for over 108+ Clients – Mar 22
2.Awarded with Blue thanks points for developing & Implementing Agile D3 Board for team - July 2022

Awards at WIPRO

1.Awarded for designing - Daily Work FLM Dashboard – Jan 2018
2.Awarded for Managing SLA– Dec

IBM & Kyndryl – Product Owner

- **As Product Owner**, I serve as the primary point of contact for customer and vendor management, ensuring seamless communication and timely issue resolution. I conduct comprehensive audits of IBM licenses, proactively identifying unused and underutilized entitlements, and implement reclaim strategies to optimize license utilization and reduce costs. I maintain oversight of all relevant software entitlements, ensuring compliance and alignment with contractual obligations.
- I lead periodic reviews with delivery and account teams, presenting actionable insights through dashboards and reports covering chargebacks, network assets, inventory flow, maintenance schedules, and service-level objectives (SLOs). I design and streamline workflows that integrate change, problem, release, and finance functions within ServiceNow, ensuring end-to-end visibility and operational efficiency.
- I drive **CMDB reconciliation activities**, validating discovered data against asset records to ensure accuracy across AMDB, SACM, and customer platforms. This includes normalizing models, resolving discrepancies between discovery sources and manually created records, and enforcing governance standards for CI attributes. I leverage ServiceNow Discovery to continuously update and enrich the CMDB with real-time infrastructure and application data, thereby improving dependency mapping, impact analysis, and audit readiness.
- Additionally, I support reconciliation across internal and customer platforms, ensuring consistency between Finance Book of Records and ServiceNow HAM/SAM modules. I continuously refine SOPs, automate reconciliation scripts, and enhance Excel-based dashboards to strengthen operational resilience, improve compliance posture, and ensure business continuity.

WIRPO Technologies – Asset Administrator

- **IT Operations & Asset Management:** Spearheaded pan-India IT operations, ensuring seamless coordination across multiple locations. Oversaw end-to-end asset management processes including material receipt, inspection, tagging, database updates, and distribution. Implemented structured asset lifecycle management through Sapphire, covering IMAC (Install, Move, Add, Change) tracking and weekly Physical Asset Verification (PAV) to maintain 100% accuracy and compliance.
- **Governance & SLA Compliance:** Championed IT governance by enforcing SLA adherence for incident resolution and operational efficiency. Designed and executed strategic IT plans that aligned technology deliverables with organizational goals. Developed and presented comprehensive monthly MIS reports, incorporating SLA dashboards, productivity metrics, incident trends, project progress, and vendor performance insights to support data-driven decision-making.
- **Service Desk Leadership:** Established and optimized service desk operations, driving efficiency and responsiveness. Led performance management of support teams through regular reviews, coaching, and issue resolution. Collaborated closely with vendors to mitigate risks and prevent escalations, ensuring uninterrupted service delivery. Maintained a strong focus on customer satisfaction by fostering trust, building relationships, and delivering exceptional support experiences.
